

Dr Carolyn Cordery – Appointment to the Lottery Community Sector Research Committee

01 September 2011

Dr Carolyn Cordery has been appointed to the Lottery Community Sector Research Committee for three years.

The research committee funds community research and evaluation. A diverse range of community organisations apply each year for funding to help them evaluate interventions, extend local and overseas research to their own community, build their capacity to undertake evaluation and research and to share their findings with others.

Carolyn is passionate about the community sector and looks forward to serving on the Committee.
