January 2019

BACHELOR OF SCIENCE

Bachelor of Science Degree Requirements

- A total of 360 points
- 210 points above 100-level, of which 150 points must be Science
- 75 points at 300-level
- 90 points can be from outside science (some majors also permit an additional 30 outside points).
- At least one Major, and a second Major may be from science or from any other first degree with a maximum of 150 points permitted from outside science.

Science Major Requirements

- 60 points at 300-level
- 60–80 points at 200-level
- 45–60 points at 100-level.

Science Minor Requirements

- 60 points above 100-level specified in the major, of which 15 points must be at 300-level.

BACHELOR OF ARTS

Bachelor of Arts Degree Requirements

360 approved points including:

- maximum of 180 points at 100-level
- minimum of 180 points at 200/300 level, including at least 75 points at 300 level
- at least 180 points must be in subjects from Part A of the BA Schedule*

*Note that Data Science, Mathematics and Statistics courses are in Part B of the BA Schedule.

PLEASE NOTE

Cancellation of courses

The courses offered by the University and listed in this prospectus may be cancelled by the University as a result of insufficient resources or student demand, or if other unforeseen circumstances arise.

Timetable changes

Check the timetable online for confirmation of course times.

<http://www.victoria.ac.nz/students/study/timetables>

HOW TO USE THIS GUIDE

Course code	Course reference number	Title	Points	Trimester
↓	↓	↓	↓ ↓	
MATH 151	CRN 17161	ALGEBRA	15 PTS	1/3

YOUR PROGRAMME

Use this template to plan your programme. Start by adding in the core papers for your degree.

Year 1:

120 points

Year 2:

120 points

--	--	--	--	--	--	--	--

Year 3:

120 points

--	--	--	--	--	--	--	--

ENTRY REQUIREMENTS 100-LEVEL MATHEMATICS AND STATISTICS

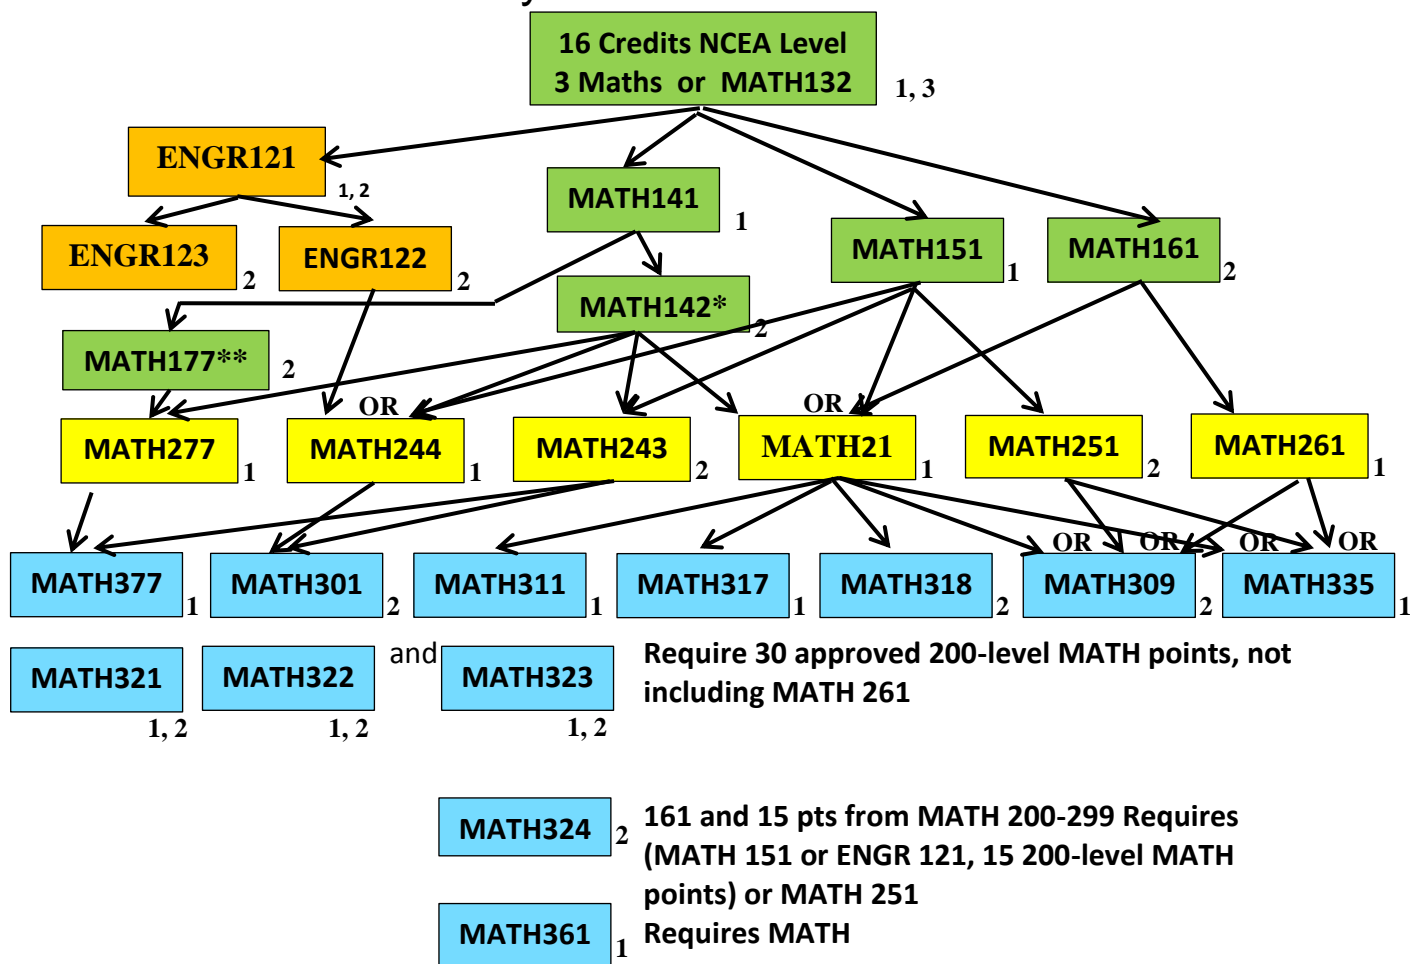

There are four levels of entry to Mathematics and Statistics courses at Victoria University:

1. Well-prepared calculus students may enrol directly in MATH 142 Calculus 1B. You will need to have passed NCEA Level 3 achievement standards 3.6 (Differentiation, AS91578), 3.7 (Integration, AS91579) and one of (3.1 (Conics, AS91573), 3.3 (Trigonometry, AS91575) or 3.5 (Complex numbers, AS91577)) with at least two achieved with merit or excellence. Equivalent qualifications will be acceptable. Otherwise MATH 141 Calculus 1A, or QUAN 111 Mathematics for Economics and Finance, is required for entry into MATH 142.
2. Reasonably well-prepared students who have gained 16 NCEA Level 3 achievement standards in mathematics (or some equivalent qualification) are given direct entry to MATH 141, Calculus 1A; MATH 151 Algebra; and MATH 161 Discrete Mathematics and Logic. Entry to MATH 177 Probability and Decision Modelling, requires 16 NCEA Level 3 achievement standards in mathematics, including achievement standards 3.6 (Differentiation, AS91578) and 3.7 (Integration, AS91579), or equivalent qualifications. Otherwise MATH 141 Calculus 1A, or QUAN 111 Mathematics for Economics and Finance, is required for entry into MATH 177.
3. Less prepared students may enter MATH 132 Introduction to Mathematical Thinking, and STAT 193 Statistics in Practice, provided they have met university entrance numeracy requirements, preferably with NCEA Level 2 achievement standard 2.6 (Algebra) as well. A pass in MATH 132 gives entry into MATH 141, MATH 151 and MATH 161.
4. Advanced students may be granted direct entry to 200-level courses. Entry is at the discretion of the appropriate programme director.

MATHEMATICS

The BSc in Mathematics is a three-year qualification. Here, we describe the regulations concerning the MATH major within the degrees. You may specialise in pure or applied branches of the subject within the major.

Summary of Mathematics Courses

MATH353 1 Requires MATH 142 and MATH 151; 15 points from MATH 243, 244, 251, 261; 15 further 200-level MATH or OPRE points

The small numbers at the bottom right corner of each box show trimesters for each course

* NCEA Level 3 Achievement Standards in Differentiation (91578), Integration (91579) and one of (Conics (91573), Trigonometry (91575), Complex numbers (91577)), including at least two standards with merit or excellence, or MATH 141 or QUAN 111

** 16 NCEA Level 3 Achievement Standard credits including Differentiation (91578) and Integration (91579), or MATH 141 or QUAN 111

15 points from ENGR 121, COMP 100-199, STAT 193, MATH 100-199

^^ ENGR 122 or ENGR 123 or (MATH 141 and MATH 151)

MAJOR REQUIREMENTS

- MATH 142, MATH 151 and MATH 161
- 60 points from MATH 300–399
- 60 further points from MATH 200–399

100-LEVEL COURSES

MATH 132	CRN 17286	INTRODUCTION TO MATHEMATICAL THINKING	15 PTS	3/3
-----------------	------------------	--	---------------	------------

Restrictions: MATH 100–199; QUAN 103, 111

This course provides an introduction to or review of fundamental skills and ideas for students who require some mathematics in their degree. Topics will include elementary arithmetic, algebra, geometry, functions, and an introduction to the basic ideas of differential calculus. There will be an emphasis on the history of mathematical ideas and how they have evolved: the goal is not only to apply mathematical tools correctly, but to understand them.

MATH 132	CRN 17150	INTRODUCTION TO MATHEMATICAL THINKING	15 PTS	1/3
-----------------	------------------	--	---------------	------------

Restrictions: MATH 100–199; QUAN 103, 111

This course provides an introduction to or review of fundamental skills and ideas for students who require some mathematics in their degree. Topics will include elementary arithmetic, algebra, geometry, functions, and an introduction to the basic ideas of differential calculus. There will be an emphasis on the history of mathematical ideas and how they have evolved: the goal is not only to apply mathematical tools correctly, but to understand them.

MATH 141	CRN 17151	CALCULUS 1A	15 PTS	1/3
-----------------	------------------	--------------------	---------------	------------

Prerequisites: 16 AS credits NCEA Level 3 Mathematics (or equivalent) or MATH 132
Restrictions: ENGR 122, MATH 142, QUAN 111

The properties of functions of one variable and their use for modelling continuous phenomena, including ideas and applications of differential and integral calculus.

MATH 142	CRN 17160	CALCULUS 1B	15 PTS	2/3
-----------------	------------------	--------------------	---------------	------------

Prerequisites: NCEA Level 3 achievement standards 3.6 (Differentiation, AS91578), 3.7 (Integration, AS91579) and one of (3.1 (Conics, AS91573), 3.3 (Trigonometry, AS91575) or 3.5 (Complex numbers, AS91577)) with at least two achieved with merit or excellence; or MATH 141 or QUAN 111, or equivalent background in Mathematics

Further topics in differential and integral calculus, including the Riemann integral, techniques of integration, differential equations, l'Hôpital's Rule, Taylor polynomials, implicit, parametric and polar representation of curves, and functions of two variables and their properties.

MATH 151	CRN 17161	ALGEBRA	15 PTS	1/3
-----------------	------------------	----------------	---------------	------------

Prerequisites: 16 AS credits NCEA Level 3 Mathematics (or equivalent) or MATH 132

An introduction to linear algebra, including matrices and vectors, systems of linear equations, complex numbers, eigenvectors, and algebraic structures.

MATH 161	CRN 17162	DISCRETE MATHEMATICS AND LOGIC	15 PTS	2/3
-----------------	------------------	---------------------------------------	---------------	------------

Prerequisites: 16 AS credits NCEA Level 3 Mathematics (or equivalent) or MATH 132

Logic underlies all of mathematics. In this course we will introduce the basic notions of logic, and discuss what makes some arguments good (or valid), while other arguments are invalid. This leads to a definition of a mathematical proof, particularly mathematical induction. Other topics include sets, relations, functions, elementary counting principles, properties of divisibility of the integers, and polynomials. The second half of the course introduces the fundamental concepts of graph theory, which is the study of networks.

MATH 177	CRN 19803	PROBABILITY AND DECISION MODELLING	15 PTS	2/3
-----------------	------------------	---	---------------	------------

Prerequisites: 16 AS credits NCEA level 3 Mathematics or Statistics, including AS 3.6 (Differentiation, AS91578) and 3.7 (Integration, AS91579), or MATH 141 or QUAN 111, or equivalent background in mathematics

An introduction to probability models in statistics, decision making and operations research, including key concepts of probability, random variables and their distributions, decision theory and utility theory. Goodness-of-fit tests are used to check the validity of fitted models.

ENGR 121	CRN 26052	ENGINEERING MATHEMATICS FOUNDATIONS	15 PTS	1/3
-----------------	------------------	--	---------------	------------

Prerequisites: 16 AS credits NCEA level 3 Mathematics (or equivalent) or MATH 132
Restrictions: Any pair (MATH 141/QUAN 111, MATH 151/161/177)

An introduction to the range of mathematical techniques employed by engineers, including functions and calculus, linear algebra and vector geometry, probability and statistics. There is an emphasis on applications and modelling.

ENGR 122	CRN 26053	ENGINEERING MATHEMATICS WITH CALCULUS	15 PTS	2/3
-----------------	------------------	--	---------------	------------

Prerequisites: ENGR 121 or MATH 141
Restrictions: The pair MATH 142 and MATH 151

Further mathematical techniques employed by electronic and computer systems engineers, with emphasis on methods of calculus, differential equations and linear algebra. There is an emphasis on engineering applications and use of software.

ENGR 123	CRN 27044	ENGINEERING MATHEMATICS WITH LOGIC AND STATISTICS	15 PTS	2/3
-----------------	------------------	--	---------------	------------

Prerequisites: ENGR 121
Restrictions: The pair MATH 161 and (MATH 177 or QUAN 102 or STAT 193)

Mathematical techniques employed by network and software engineers, including methods of combinatorics, logic, probability and decision theory. The course emphasises engineering applications of these techniques.

200-LEVEL COURSES

MATH 212	CRN 31091	INTRODUCTION TO REAL ANALYSIS	15 PTS	1/3
Prerequisite:		MATH 142		
Restriction:		MATH 211		

An introduction to the basic techniques of real analysis in the familiar context of single-variable calculus.

MATH 243	CRN 18323	MULTIVARIABLE CALCULUS	15 PTS	2/3
Prerequisites:		MATH 142,151		

The calculus of vector-valued functions of one variable (curves in the plane and in space), of scalar-valued functions of several variables, and of vector-valued functions of several variables (vector fields); double and triple integrals, line and surface integrals.

MATH 244	CRN 18324	MODELLING WITH DIFFERENTIAL EQUATIONS	15 PTS	1/3
Prerequisites:		(ENGR 121, 122) or (MATH 142, 151)		

Types of ordinary differential equations and methods of solution (analytical methods, numerical algorithms, Fourier series, Laplace transforms); boundary-value and initial-value problems; systems of equations; qualitative analysis of solutions; applications.

MATH 245	CRN 30099	COMPUTATIONAL MATHEMATICS	15 PTS	2/3
Prerequisites:		ENGR122 or ENGR123 or (MATH151 and (141 or 142))		

Mathematical, numerical and computational techniques for practical problems involving optimization, simulation and approximation. The course emphasises the properties and implementation of numerical algorithms for solving linear, non-linear and differential equations, least squares, singular-value decomposition, splines and Monte Carlo methods. Some previous experience in programming is highly desirable.

MATH 251	CRN 18325	LINEAR ALGEBRA	15 PTS	2/3
Prerequisites:		MATH 151		

Fields, vector spaces, linear transformations, eigenvectors, spectral decomposition, quadratic forms.

MATH 261	CRN 18326	DISCRETE MATHEMATICS 2	15 PTS	1/3
Prerequisites:		MATH 161		

Enumerative combinatorics (binomial coefficients, the inclusion-exclusion principle, generating functions) and algorithmic graph theory (shortest paths, matchings, flows).

MATH 277	CRN 19804	MATHEMATICAL STATISTICS	15 PTS	1/3
Prerequisites:		MATH 142, 177		

Topics will be chosen from: basic probability theory; introduction to random variables and expectation; joint distributions, correlation and linear combinations of random variables; introductory estimation and hypothesis testing; nonparametric methods; one-way analysis of variance; linear regression; goodness of fit tests and contingency tables. The statistical software R will be used.

300-LEVEL COURSES

MATH 301	CRN 3505	DIFFERENTIAL EQUATIONS	15 PTS	2/3
-----------------	-----------------	-------------------------------	---------------	------------

Prerequisites: MATH 243, 244
 Recommended: MATH 251

Exact solution and qualitative analysis of systems of ordinary differential equations; partial differential equations; applications.

MATH 309	CRN 7528	MATHEMATICAL LOGIC	15 PTS	2/3
-----------------	-----------------	---------------------------	---------------	------------

Prerequisites: MATH 161, one course from (MATH 211, 212, 251, 261),
 15 further 200-level MATH pts

An introduction to the semantics and proof theory of symbolic languages, explaining the role of logic in describing mathematical structures and formalising reasoning about them. Topics covered include propositional logic; first-order logic of quantifiers and predicates; and the beginnings of model theory, including completeness and compactness theorems.

MATH 311	CRN 9591	ALGEBRA	15 PTS	2/3
-----------------	-----------------	----------------	---------------	------------

Prerequisites: MATH 151, MATH 251 or 261

The basic algebraic structures, especially groups, rings and fields, with emphasis on general concepts, such as subgroups, homomorphisms, and factorization; some applications.

MATH 317	CRN 31092	METRIC SPACES	15 PTS	1/3
-----------------	------------------	----------------------	---------------	------------

Prerequisites: MATH 211 or 212
 Restriction: MATH 312

An introduction to spaces with a generalised length function called a metric. Metric spaces are fundamental objects in modern analysis with notions of convergence of sequences and continuity of functions in a very general framework.

MATH 318	CRN 31093	HILBERT SPACES	15 PTS	2/3
-----------------	------------------	-----------------------	---------------	------------

Prerequisites: MATH 211 or 212, MATH 251

An introduction to Hilbert spaces and linear operators on Hilbert spaces. It extends the techniques of linear algebra and real analysis to study problems of an intrinsically infinite-dimensional nature.

MATH 321	CRN 19910	APPLIED MATHEMATICS I	15 PTS	1/3
	CRN 19911		15 PTS	2/3

Prerequisites: 30 approved 200-level MATH points, not including MATH 261

Two topics in applied mathematics, not including any taken by the same candidate in MATH 322 or MATH 323. Topics may include: Cartesian tensors and applications, seismology, classical mechanics, fluid mechanics, meteorology, fractals, quantum mechanics, special relativity.

MATH 322	CRN 19740	APPLIED MATHEMATICS II	15 PTS	1/3
	CRN 546		15 PTS	2/3

Prerequisites: 30 approved 200-level MATH points, not including MATH 261

Two topics in applied mathematics, not including any taken by the same candidate in MATH 321 or MATH 323. Topics may include: Cartesian tensors and applications, seismology, classical mechanics, fluid mechanics, meteorology, fractals, quantum mechanics, special relativity.

MATH 323	CRN 19741	MATHEMATICS FOR EARTH SCIENCES	15 PTS	1/3
	CRN 8584		15 PTS	2/3

Prerequisites: 30 approved 200-level MATH points, not including MATH 261

Two topics in applied mathematics, chosen from the following, and not including any taken by the same candidate in MATH 321 or MATH 322: fluid mechanics, Cartesian tensors and applications, differential equations for earth sciences, meteorology project, meteorology coursework, fractals, classical mechanics.

MATH 324	CRN 15668	CODING AND CRYPTOGRAPHY	15 PTS	2/3
-----------------	------------------	--------------------------------	---------------	------------

Prerequisites: MATH 251 or (ENGR 121 or MATH 151; 15 further 200-level MATH points)

The main ideas of modern coding theory (finite vector spaces, linear codes, coding bounds, perfect codes, cyclic codes) and cryptography (classical ciphers, the one-time pad, Shannon's Theorem, linear shift registers, public key cryptography, one-way functions, the RSA cryptosystem, key distribution and digital signatures).

MATH 335	CRN 19902	COMPUTABILITY AND COMPLEXITY	15 PTS	1/3
-----------------	------------------	-------------------------------------	---------------	------------

Prerequisites: MATH 161, one course from (MATH 211, 212, 251, 261), 15 further pts from (MATH 200-299 or COMP 261)

The basic theory of the algorithmic content of mathematics. Models of computation. Undecidability and computational calibration via reducibilities and hierarchies. Applications (word problems, Conway games, etc.), Basic complexity. NP, SPACE and P. Combinatorial reductions and probabilistic and parametrized complexity.

MATH 353	CRN 19903	OPTIMISATION	15 PTS	1/3
-----------------	------------------	---------------------	---------------	------------

Prerequisites: MATH 142, 151; 15 points from (MATH 243, 244, 251, 261); 15 further 200-level MATH or OPRE points

A course in the theory, algorithms and applications of optimisation, including the use of a computer package to formulate, solve and interpret optimisation problems.

MATH 361	CRN 29085	GRAPH THEORY	15 PTS	1/3
-----------------	------------------	---------------------	---------------	------------

Prerequisites: MATH 161 and 15 pts from MATH 200-299

Topics in graph theory including: Menger's Theorem and connectivity, colourings and flows, Ramsey Theory, topological graph theory including Kuratowski's Theorem, tree width and its applications.

MATH 377	CRN 19805	PROBABILITY AND RANDOM PROCESSES	15 PTS	1/3
-----------------	------------------	---	---------------	------------

Prerequisites: MATH 243, 277

The course provides a firmer foundation in probability theory and an introduction to random processes. Introductory topics: continuity of probability measures; Stieltjes integrals; almost sure convergence. Main topics: conditional distributions and effects of conditioning; martingales in discrete time; Poisson point processes; birth and death processes; renewal processes.

STATISTICS

The Statistics major can have a theoretical (mathematical statistics) emphasis, an applied emphasis, or incorporate computational modelling, depending on the courses you take.

MAJOR REQUIREMENTS

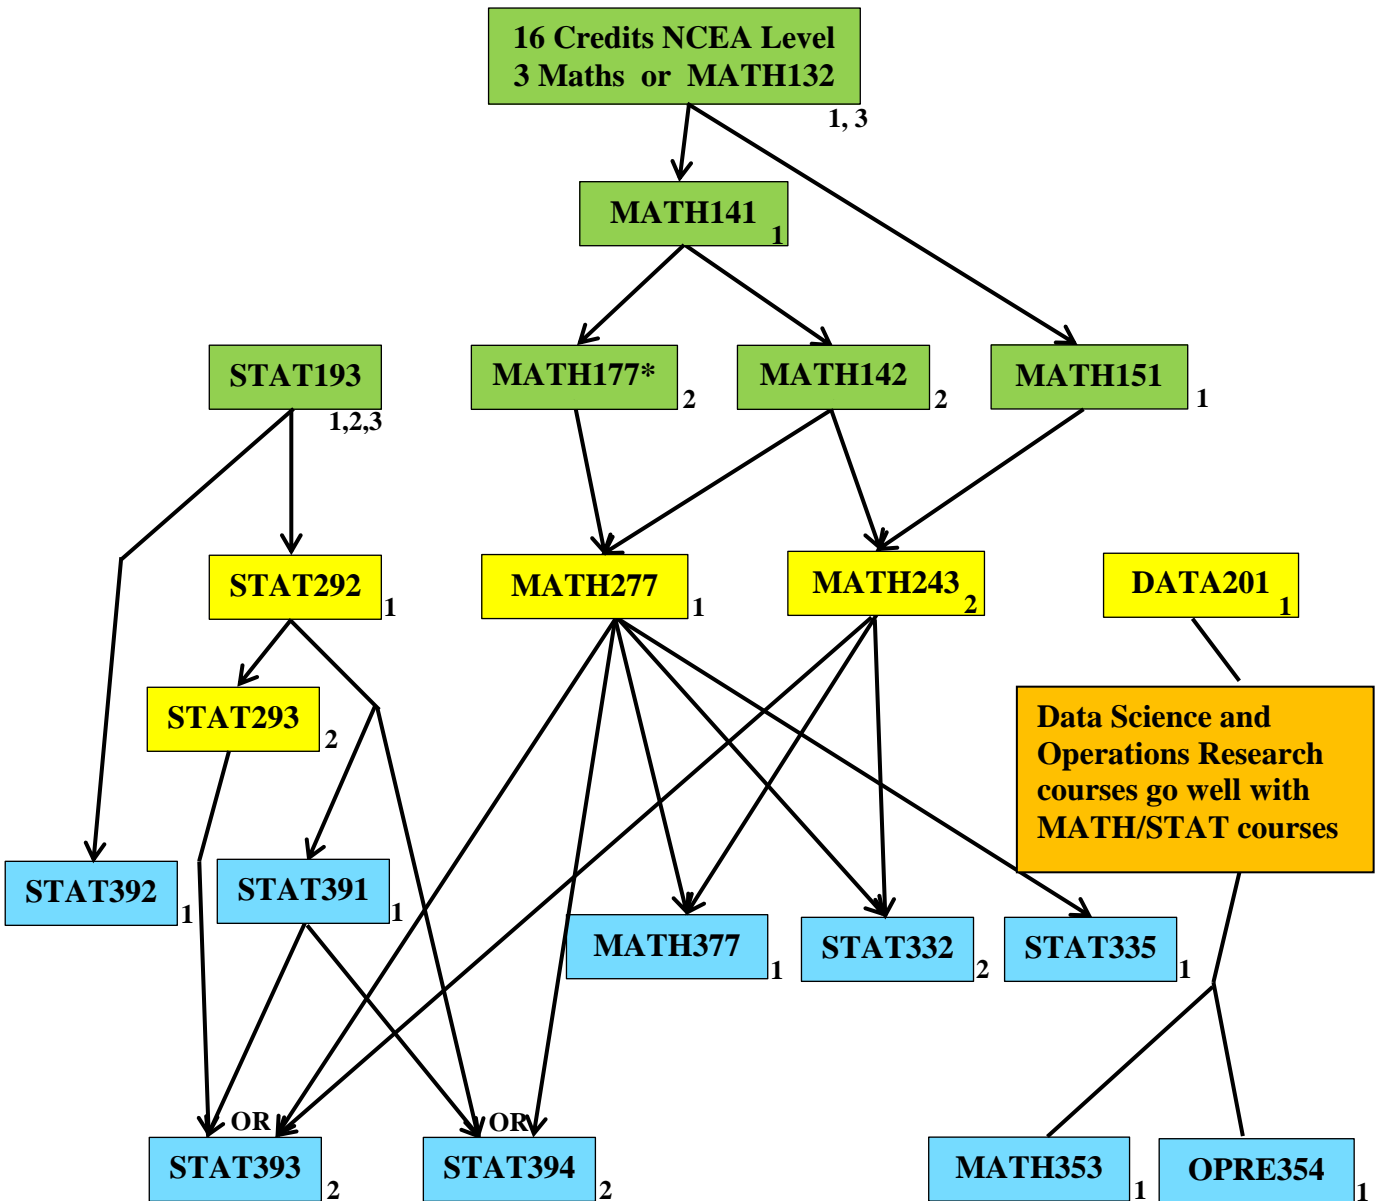

- MATH 177 or STAT 193; 15 further points from MATH 100–199, STAT 100–199
- (MATH 243, 277) or (STAT 292, 293); 30 further 200–level points from the Science Schedule
- STAT 332 or 393; 15 further points from STAT 300–399; 30 further 300-level points from (MATH, OPRE, STAT)

- **MATH 177** is needed for a major in **Statistics** with a **mathematical statistics** or **computational modelling** emphasis and for a major in **Actuarial Science**.
- **STAT 193** is highly recommended for a major in **Statistics** with an **applied statistics** emphasis and for a major in **Data Science**.

MINOR REQUIREMENTS

- One of (MATH 277, STAT 292) and one of (MATH 377, STAT 332, 393, 394)
- 15 further points from (MATH 277, 353, 377, STAT 292, 293, 300-399)

Summary of Statistics Courses

The small numbers at the bottom right corner of each box show trimesters for each course

* NCEA Level 3 Achievement Standards in Differentiation (91578), Integration (91579) and one of (Conics (91573), Trigonometry (91575), Complex numbers (91577)), including at least two standards with merit or excellence, or MATH 141 or QUAN 111

** 16 NCEA Level 3 Achievement Standard credits including Differentiation (91578) and Integration (91579), or MATH 141 or QUAN 111

^ One of (COMP 102, 112, 132, INFO 151) and one of (MATH 177, QUAN 102, STAT 193)

100-LEVEL COURSES

MATH 177	CRN 19803	PROBABILITY AND DECISION MODELLING	15 PTS	2/3
-----------------	------------------	---	---------------	------------

Prerequisites: 16 AS credits NCEA level 3 Mathematics or Statistics, including AS 3.6 (Differentiation, AS91578) and 3.7 (Integration, AS91579), or MATH 141 or QUAN 111, or equivalent background in Mathematics.

An introduction to probability models in statistics, decision making and operations research, including key concepts of probability, random variables and their distributions, decision theory and utility theory. Goodness-of-fit tests are used to check the validity of fitted models.

STAT 193 (SEE STREAMS)	STATISTICS IN PRACTICE	15 PTS	1/3
			2/3
			3/3

Restrictions: MATH 277, QUAN 102

Streams:

1/3:	Stream A (CRN 1791)
	Stream B (CRN 11333)
2/3:	Stream A (CRN 4442)
	Stream B (CRN 6164)
3/3:	Stream A (CRN 17069)

An applied statistics course for students who will be advancing in other disciplines as well as those majoring in Statistics. It is particularly suitable for students majoring in Biological Science subjects, Geography, Linguistics, Psychology, social sciences such as Education, and is also suitable for BCom students. This course assumes no previous knowledge of statistics, but mathematics to Year 12 is preferred. Topics covered include estimation, confidence intervals and hypothesis testing, comparison of means and proportions, simple regression and correlation, and analysis of variance.

200-LEVEL COURSES

MATH 277	CRN 19804	MATHEMATICAL STATISTICS	15 PTS	1/3
-----------------	------------------	--------------------------------	---------------	------------

Prerequisites: MATH 142, 177

Topics will be chosen from: basic probability theory; introduction to random variables and expectation; joint distributions, correlation and linear combinations of random variables; introductory estimation and hypothesis testing; nonparametric methods; one-way analysis of variance; linear regression; goodness of fit tests and contingency tables. The statistical software R will be used.

STAT 292	CRN 18331	APPLIED STATISTICS 2A	15 PTS	1/3
-----------------	------------------	------------------------------	---------------	------------

Prerequisites: STAT 193 or a comparable background in Statistics

This course is central to the Applied Statistics stream. Topics are statistical methods and their application in the biological, environmental, health and social sciences, including design of experiments, one-way and multi-way ANOVA and t-tests for difference of means, regression, analysis of covariance, binomial and Poisson distributions, contingency tables, models for binary response variables, and loglinear models for contingency tables. Examples from the biological, environmental, health, behavioural and social sciences are used for illustration, using the statistical computing package SAS Enterprise Guide.

STAT 293	CRN 18332	APPLIED STATISTICS 2B	15 PTS	2/3
-----------------	------------------	------------------------------	---------------	------------

Prerequisites: STAT 292

Following on from STAT 292, this course presents further topics in ANOVA and regression with examples in the biological, environmental, health and social sciences. Topics covered include algebra of expectations and variances, one-way ANOVA theory, permutation tests, randomised block designs, nested designs, multiple linear regression, data exploration, use of AIC for model comparisons in exploratory studies, Poisson regression models. Illustrative examples use the statistical software R. No previous experience with R is assumed.

300-LEVEL COURSES

COMP 312	CRN 10444	SIMULATION AND STOCHASTIC MODELS	15 PTS	1/3
-----------------	------------------	---	---------------	------------

Prerequisites: COMP 102 or 112, one course from (MATH 177, 277, STAT 292, ENGR 123); 15 further 200-level COMP, MATH, NWEN, OPRE, STAT or SWEN points

Restrictions: OPRE 354

Simulation and modelling of stochastic systems, covering examples from operations research and computer science, including queues, networks and computer systems. Design, analysis and validation of simulation experiments. Previous experience with computer programming is required before starting this course. Also taught as DATA 304.

MATH 377	CRN 19805	PROBABILITY AND RANDOM PROCESSES	15 PTS	1/3
-----------------	------------------	---	---------------	------------

Prerequisites: MATH 243, 277

The course provides a firmer foundation in probability theory and an introduction to random processes. Introductory topics: continuity of probability measures; Stieltjes integrals; almost sure convergence. Main topics: conditional distributions and effects of conditioning; martingales in discrete time; Poisson point processes; birth and death processes; renewal processes.

STAT 332	CRN 19809	STATISTICAL INFERENCE	15 PTS	2/3
-----------------	------------------	------------------------------	---------------	------------

Prerequisites: MATH 243, 277

This course covers distribution theory; estimation including minimum variance unbiased estimators and sufficiency; hypothesis testing and an introduction to order statistics. The topics of estimation and hypothesis testing met in MATH 277 will be looked at in greater depth. Optimal estimation procedures and tests will be developed.

STAT 335	CRN 27136	STATISTICAL MODELS FOR ACTUARIAL SCIENCE	15 PTS	1/3
-----------------	------------------	---	---------------	------------

Prerequisites: MATH 277

This course introduces a range of models used in actuarial science, including Markov chains, Markov processes and transition, survival models and estimation with graduation methods and binomial models for mortality.

STAT 391	CRN 19810	MATHEMATICAL METHODS FOR APPLIED STATISTICS	15 PTS	1/3
-----------------	------------------	--	---------------	------------

Prerequisites: STAT 292

Restrictions: MATH 243, and both (ENGR 122/MATH 142, 251)

This course covers key mathematical methods used in the construction and maximisation of likelihoods, analyses of experimental data and general linear models, and exploration of probability distributions. Topics will include differentiation and optimisation of functions, matrices and their properties, probability distributions and integration. The statistical software R will be used.

STAT 392	CRN 3048	SAMPLE SURVEYS	15 PTS	1/3
Prerequisites:		STAT 193 (or equivalent), 30 approved points from 201-399		
Restrictions:		STAT 439		

An introduction to practical aspects of survey sampling, including writing a survey proposal, costing, non-sampling errors, rudiments of sampling theory, questionnaire design, fieldwork, basic analytic techniques, and report writing. This course is co-taught with STAT 439.

STAT 393	CRN 19811	LINEAR MODELS	15 PTS	2/3
Prerequisites:		(MATH 243, 277) or (STAT 293, 391)		

This course will cover general linear models: theory and applications, including maximum likelihood estimation, model selection, AIC, tests of hypotheses, confidence intervals, and residual diagnostics. It includes longitudinal analysis for continuous responses using fixed or random effects methods. The course covers the theory of generalised linear models and gives examples for binary and count data. The statistical software R will be used.

STAT 394	CRN 19808	MULTIVARIATE STATISTICS	15 PTS	2/3
Prerequisites:		MATH 277 or (STAT 292, 391)		

General concepts and various practical analysis techniques are introduced for multivariate data. Topics will be chosen from: principal component analysis, cluster analysis, factor analysis, discriminant analysis, canonical correlations, the multivariate general linear model and multidimensional scaling. The statistical software SAS Enterprise Guide will be used to apply the techniques to multivariate data.

ACTUARIAL SCIENCE

The role of an actuary is to quantify risk and uncertainty to help businesses manage those risks. Actuaries are employed by banks, insurance companies, investment firms and other companies. They give advice on insurance, pension schemes, company mergers, the management of financial projects and investments.

The Actuarial Science major introduces students to the technical and professional aspects of actuarial science and may enable students to gain accreditation towards qualifying as an actuary with one of the internationally recognised actuarial institutes.

Students enrolling in this major, available in both the Bachelor of Science (BSc) and Bachelor of Commerce (BCom), may consider taking it alongside a second major in Economics, Finance, Mathematics or Statistics. Graduates will be qualified to work in the fields of actuarial work, risk management, financial and statistical analysis.

MAJOR REQUIREMENTS

- a. ACCY 130, ECON 130, 141, MATH 142, 177 (MATH 151 or at least a B+ in QUAN 111)
- b. ACTS 201, ECON 201, FINA 201 or 202, MATH 277
- c. ACTS 301, (FINA 303 or 306), STAT 335; one further course from (ACTS 336, FINA 303, 306, MATH 377).

Faculty contact: Kevin Gould, Associate Dean (Students) kevin.gould@vuw.ac.nz 04-463 6649 or 04-463 5101

	Trimester 1	Trimester 2
Year 1	ACCY 130: Accounting for Decision Making ECON 130: Microeconomic Principles MATH 141: Calculus 1A MATH 151: Algebra	ECON 141: Macroeconomic Principles MATH 142: Calculus 1B MATH 177: Probability and Decision Modelling
	+ 15 further points	
Year 2	ACTS 201: Financial Mathematics ECON 201: Intermediate Microeconomics FINA 201: Introduction to Corporate Finance MATH 277: Mathematical Statistics	FINA 202: Introduction to Investments MATH 243: Multivariable Calculus
	+ 30 further points	
Year 3	MATH 377: Probability and Random Processes STAT 335: Statistical Models for Actuarial Science	ACTS 301: Actuarial Science FINA 303: Derivatives FINA 306: Financial Economics
	+ 45 further points	

MINOR REQUIREMENTS

ACTS 201, 301, MATH 277 and one further course from part (b) or (c) of the major requirements.

200-LEVEL COURSES

ACTS 201	CRN 29082	FINANCIAL MATHEMATICS	15 PTS	1/3
Prerequisites:		QUAN 102 (or STAT 193 or MATH 177), QUAN 111 (or MATH 141/142, 151)		

Mathematical principles of compound interest, geometric series and annuities; valuation of loans; returns on financial transactional duration and immunisation theory; term structure of interest rates; stochastic interest rates.

300-LEVEL COURSES

ACTS 301	CRN 27135	ACTUARIAL SCIENCE	15 PTS	2/3
Prerequisites:		ACTS 201, ECON 141, MATH 277		

This is a capstone course for the Actuarial Science major that brings together skills and knowledge from prior courses to develop an understanding of their practical application in the actuarial profession. It provides grounding in the mathematical techniques that can be used to model risks and contingencies.

ACTS 336	CRN 31125	GENERAL INSURANCE TECHNIQUES	15 PTS	2/3
Prerequisites:		MATH 277		

This course provides the mathematical foundation necessary to set premiums and reserves for general insurance contracts. It provides an overview of the various techniques used in general insurance, including loss distributions, ruin theory, credibility, run-off triangles and general insurance modelling.

STAT 335	CRN 27136	STATISTICAL MODELS FOR ACTUARIAL SCIENCE	15 PTS	1/3
Prerequisites:		MATH 277		

This course introduces a range of models used in actuarial science, including Markov chains, Markov processes and transition, survival models and estimation with graduation methods and binomial models for mortality.

DATA SCIENCE

Data literacy is an essential component of future citizenry – the ability to make sense of data, critique its use and communicate with and about it, are becoming hugely valuable skills. Data Science combines ideas from statistics, computing and mathematics to provide new insights that are crucial to the survival of businesses, governments and institutions that want to transform their data into information, insights and novel data products. Pair your Data Science major alongside another subject to extract and provide meaningful insights to any field, including actuarial science, biology, chemistry, economics, geography, linguistics and media studies.

MAJOR REQUIREMENTS

- a. DATA 101; one of (COMP 102, 112, 132, the pair (INFO 151, 226)); one of (MATH 177, QUAN 102, STAT 193)
- b. DATA 201, 202; one of (MATH 277, QUAN 203, STAT 292), one further course from (COMP 261, GEOG 215, INFO 264, MATH 245, 251, 261, 277, PHIL 269, QUAN 201, 203, STAT 292, 293)
- c. DATA 301, 303, COMP 309*; one of (DATA 304-399, COMP 307, ECON 303, GEOG 315, INFO 377, MARK 317, MATH 353, MGMT 315, 316, STAT 392, 394, SWEN 304)

School contact: Stephen Marsland, **stephen.marsland@vuw.ac.nz** 04-463 9695
Faculty contact: Kevin Gould, Associate Dean (Students) **kevin.gould@vuw.ac.nz** 04-463 6649 or 04-463 5101

Sample programme for BSc major:

	Trimester 1	Trimester 2
Year 1	DATA 101: <i>Introduction to Data Science</i> STAT 193: <i>Statistics in Practice</i> MATH 141: <i>Calculus 1A</i> MATH 151: <i>Algebra</i>	COMP 132: <i>Programming for the Natural and Social Sciences</i> INFO 151: <i>Databases</i> MATH 142: <i>Calculus 1B</i> MATH 177: <i>Probability and decision Modelling</i>
Year 2	DATA 201: <i>Techniques of Data Science</i> STAT 292: <i>Applied Statistics 2A</i> CYBR 171: <i>Cybersecurity Fundamentals</i> PHIL 269: <i>Ethics and Data</i>	DATA 202: <i>Data Management and Programming</i> GEOG 215: <i>Introduction to GIS</i> MATH 245: <i>Computational Mathematics</i> STAT 293: <i>Applied Statistics 2B</i>
Year 3	DATA 303: <i>Statistics for Data Science</i> DATA 304: <i>Simulation and Stochastic Models</i> MATH 353: <i>Optimisation</i> SCIS 211: <i>Contemporary Issues in Science, Environment and Technology</i>	DATA 301: <i>Data Science in Practice</i> COMP 309: <i>Machine Learning Tools and Techniques</i> DATA 351: <i>Data Science Internship</i> STAT 394: <i>Multivariate Statistics</i>

MINOR REQUIREMENTS

DATA 201, 202, 301 and one further course from parts (b) or (c) of the major requirements.

100-LEVEL COURSES

DATA 101	CRN 31056	INTRODUCTION TO DATA SCIENCE	15 PTS	1/3
-----------------	------------------	-------------------------------------	---------------	------------

An introduction to Data Science. This course addresses sources and types of data, principles of information systems, databases, data generation, acquisition, transmission and storage, and aspects of data security. Issues of accuracy, privacy and the ethics of data and the legislative framework of data collection, transmission, storage and use are introduced, including specific aspects of Māori data sovereignty and obligations under the Treaty of Waitangi relevant to data science. Students will work with data sources from science, the humanities and commerce and will apply their knowledge to propose solutions to real-world problems using data.

200-LEVEL COURSES

DATA 201	CRN 31057	TECHNIQUES OF DATA SCIENCE	15 PTS	1/3
-----------------	------------------	-----------------------------------	---------------	------------

Prerequisites: One of (COMP 102, 112, 132, INFO 151), one of (MATH 177, QUAN 102, STAT 193)

Corequisite: DATA 101

Computational techniques relevant to data science, including data integration and encryption. Mathematical concepts and techniques underlying data generation, representation and transformation.

DATA 202	CRN 31058	DATA MANAGEMENT AND PROGRAMMING	15 PTS	2/3
-----------------	------------------	--	---------------	------------

Prerequisites: One of (COMP 102, 112, 132, the pair (INFO 151, 226))

Restriction: SCIE 201 in 2017/18

An introduction to practical aspects of data management for those who work with data sources. Students will apply programming and data management techniques using a high-level language and SQL. Web scraping, data transformation, data cleaning, summary and visualisation.

300-LEVEL COURSES

DATA 301	CRN tbc	DATA SCIENCE IN PRACTICE	15 PTS	2/3
-----------------	----------------	---------------------------------	---------------	------------

Not offered until 2020

Prerequisites: DATA 201, one of (DATA 202, SCIE 201 in 2017/18)

A capstone course in data science. The course will introduce interactive displays, infographics and dashboards, focussing on communication, reporting and visualisation. It will bring together techniques in statistical and mathematical modelling with programming as well as social and ethical perspectives on data science.

DATA 303	CRN tbc	STATISTICS FOR DATA SCIENCE	15 PTS	1/3
-----------------	----------------	------------------------------------	---------------	------------

Not offered until 2020

Prerequisites: One of (COMP 102, 112, 132, DATA 202, SCIE 201 in 2017/18), one of (MATH 277, QUAN 203, STAT 292)

The course develops aspects of statistical modelling and inference underpinning data science, including binary, count and ordinal data. The role of data and modelling in decision making is examined in a variety of contexts.

DATA 304	CRN tbc	SIMULATION AND STOCHASTIC MODELS	15 PTS	1/3
-----------------	----------------	---	---------------	------------

Not offered until 2020

Prerequisites: COMP 102 or 112, one course from (MATH 177, 277, STAT 292, ENGR 123); 15 further 200-level COMP, MATH, NWEN, OPRE, STAT or SWEN points

Restrictions: COMP 312, OPRE 354

Simulation and modelling of stochastic systems, covering examples from operations research and computer science, including queues, networks and computer systems. Design, analysis and validation of simulation experiments. Previous experience with computer programming is required before starting this course. Also taught as COMP 312.

DATA 351	CRN tbc	DATA SCIENCE INTERNSHIP	15 PTS	2/3 3/3
-----------------	----------------	--------------------------------	---------------	--------------------------

Not offered until 2020

Prerequisites: DATA 201, one of (MATH 277, STAT 292), one of (DATA 202, QUAN 203, SCIE 201 in 2017/18), 15 further 200-level points all with B+ average

Students will complete an approved and supervised project in a public, private or non-profit organisation with established data science work stream. It will enable students to gain professional work experience in the application of data science and to develop teamwork and communication skills in a relevant organisation.

WHO TO CONTACT

Victoria University offers a range of services that covers all student-related matters from applications/enrolment to graduation.

STUDENT AND ACADEMIC SERVICES—FACULTY OF SCIENCE

Te Wāhanga Pūtaiao

Address: Level 1, Cotton Building
Phone: 04-463 5101
Email: science-faculty@vuw.ac.nz
Website: www.victoria.ac.nz/science
Hours: 8.30am–4.00pm Monday, Wednesday, Thursday, Friday
9.30am–4.00pm Tuesday

At the Faculty of Science Student Administration Office, student advisers can help with admission requirements, degree planning, changing courses and transfer of credit from other tertiary institutions. They also deal with other aspects of student administration such as enrolment, exams organisation and the maintenance of student records.
