Working on a Building Site: An ESOL Resource

Resource developed by Nicky Riddiford from authentic data collected by the Language in the Workplace Project, School of Linguistics and Applied Language Studies, Victoria University of Wellington.

Resource available at www.victoria.ac.nz/lwp

Funding received from the Settlement Unit of the Ministry of Business, Innovation and Employment.
About this resource

Who this resource is for

This resource is an English language listening resource designed for learners at a beginner/elementary level in reading, writing, listening and speaking who come from non-English speaking backgrounds and who plan to work in the construction industry.

It is designed for use in workplace focused ESOL classes or communication training courses in English speaking countries, especially, but not exclusive to, Australia and New Zealand. The book could also be used in one-to-one tutoring contexts.

How this resource is organised

The resource has been developed from recordings of ordinary everyday interactions between builders as they go about their work on a building site. The recorded interactions were collected, transcribed and analysed by the Language in the Workplace researchers from the School of Linguistics and Applied Language Studies at Victoria University of Wellington.

Each of the units in the resource addresses a speech function or set of related speech functions that are common in the construction industry. The first units focus on understanding directives on a building site.

Each unit is based on a rerecording of an authentic interaction on a building site. The units follow a top-down approach where learners are prompted to focus on the general meaning of the interaction before any intensive focus on the specific language features. The units provide opportunities for learners to listen to the interaction many times, to focus on and notice specific language features of the interaction and then to practise these features. Each unit is divided into the following parts:

1. Pre-listening activities where learners are encouraged to draw on their existing knowledge of the construction industry.
   a. Setting the scene: Questions to introduce the first unit are: Look at the picture: Who works on a building site? What do they do? What do they use? What is your experience of working on a building site? Pictures and objects to supplement what is provided in the unit would be useful.
   b. Prediction: In this section, learners are asked to predict what might be happening from the title and context of the unit. The teacher could then elicit possible content words, for example, the vocabulary for the predicted equipment and predicted actions.
   c. Pre-teaching of content words: Teachers could use objects, pictures, actions wherever possible to supplement the pictures provided in the unit.
2. Listening activities. In this section learners are introduced to the listening activity using the top-down approach. Learners are encouraged to discuss their answers together, perhaps in small groups or pairs.

Each unit includes these features:
   a. Listening for the main ideas/gist while looking at the strip story. What is happening? The recording could be played many times.
   b. Listening to notice specific details: vocabulary.
   c. Listening and looking at the text.
   d. Listening for further details, for example, prepositions, actions.
   e. Listening for the language used in the directives.
   f. Listening for strategies for checking and clarifying directives.
   g. Opportunities to practise clarifying and checking.

3. Post-listening activities.
   a. Activities to retell and role-play the interaction.
   b. Suggestions for more open-ended role-plays.
   c. Vocabulary revision with an audio recording.

4. Audio recordings.
   Re-recordings of the authentic conversations that form the basis of each unit are available for downloading from the website. The audio files for most units include:
   a. A word/picture matching exercise.
   b. The whole conversation with the participants speaking at a normal native speaker speed (labelled N).
   c. The whole conversation with the participants speaking more slowly (labelled S).
   d. Short clips of the conversation (slower version) for intensive listening to specific phrases and interactions.
   e. The key vocabulary in the unit.
Understanding and following instructions on a building site

Talk to your partner

Who works on a building site?

What do they do?

What do they use?

What do they say?
Understanding and following instructions on a building site

Unit 4: Finding the nails

Look at the picture. Tell your partner what you can see.

What are the builders wearing?

What tools are they using?

What are they saying?
Max needs some nails and screws. He asks Rick to find them.
1. Vocabulary

a. Here are pictures of some of the words you will hear.

Listen to your teacher and repeat the words.

some nails
a few flooring nails
a black bin
a box of screws
a builder’s pocket
a shed
a black cordless drill
a dumpy
a couple of screws
b. *Listen* and number the pictures in the order you hear. The first one is done for you:

2. Listen to the conversation between Max and Rick:

Audio clip 2N and 2S

a. Listen to the conversation and look at the pictures.

Find out:
Who is talking?
What is happening?
What are their names?
What are they doing?
What does Rick have to do?
Finding the Nails

What nails do we need for this?

We want those flooring ones.

They're 65 galves. Go find some more of those ones.

They'll be in the shed back there. A couple of those.

Which ones?
A few minutes later

Those ones there

Just pop them down in that black bin.

Can you just go find a box of screws?

You just grab a couple of those screws and stick them in your pocket.
Um, now… cordless drill. Can you just go find that black cordless drill?

That’s inside there somewhere, please mate.

Might grab the dumpy back as well.

Quite handy to have the dumpy back, eh? If they don’t need it.

Sweet

Yep
3. **Listen** to the conversation again.
