### Introduction

#### Course aim

To provide an overview of issues in contemporary environmental management and sustainability, both in general and in the New Zealand context. Environmental management and ‘resource management’ are distinguished, as are management and governance. The course provides a broad view of relevant concepts and frameworks (for example, sustainability, the precautionary approach, systems thinking), tying these to the development of thinking about environmental governance and management.

In addition to introducing relevant concepts and frameworks, the course illustrates application of these ideas and frameworks to current environmental challenges, ranging from water management to urban design. The course also introduces practical environmental management tools, including communication tools, and analyses challenges of environmental behaviour change.

#### Learning objectives and approach

By the end of this course, you should have a good understanding of:

1. The big picture of challenges facing environmental management and sustainability, and ways of seeing these challenges  
2. The main aspects of environmental governance and management

Ralph Chapman  
VUW  
page 1
3. How to improve environmental outcomes, including through behaviour change.

The first assignment (see below) relates to point 1 above; the second assignment relates to points 1-3, as does the final examination. Learning is based on readings, discussion and a few presentations by selected guest speakers. The timing of invited contributors may be adjusted during the year, if invitees’ commitments change.

In selecting the readings we seek to introduce students to a wide range of examples of issues in environmental management, drawing on a mix of countries, from the UK to the Netherlands to New Zealand, and on a variety of international institutions such as the European Environment Agency (EEA) and OECD, through to local organisations including New Zealand NGOs. (Some useful websites are provided at the end of this course outline.)

There are no group-work requirements as such, although each seminar will include a sharing of ideas through discussion of two prescribed readings. Except for the first week, the discussion will be led by students. Each student will do at least one presentation on a reading during the course. The lecturer on the day will moderate the discussion, but all class members are expected to contribute: you will be expected to have done the reading and may well be embarrassed if you have not. The seminars will also usually include a presentation by the lecturer or by a visiting speaker, providing a perspective on key issues of the week, or on a significant topic in the course.

As this is a graduate seminar class, you, as a class member are expected to have also done your own selection of recommended readings. If you wish to get the most from the class you will have consistently read several of the recommended readings before the relevant class, and will come prepared to discuss key insights from those readings. Workload is consistent with a 15-point course, i.e. around 150 hrs overall, including seminars, reading, and assessment tasks.

Materials
As noted, there are two sorts of readings: prescribed (you must do these) and recommended. Additional prescribed or recommended reading may be identified either in a revision of the Course programme below, or at the class the week before.

I will distribute, about one week before each seminar, a guidance note with questions to focus your reading. Do not interpret this as ‘sufficient’ or the only matters on which to focus attention.

Please let me know if the URLs shown below have become outdated or you are having difficulty accessing any readings. The Course readings will be updated during the year. There are no prescribed books for the course. If you are finding it difficult to understand the readings, or you would like further reading suggestions, please contact me..

Course assessment

- Assignment 1 due Fri 5 April, noon (an essay of up to 1,500 words) 20%
- Assignment 2 due Thurs 16 May, noon (a short research project: 3,000 words) 30%
- Presentation (critical commentary) on a reading to the class 10%
- 2-hour closed book exam (in period Sat 15 Jun – Wed 3 Jul) 40%

---

1 The topic for this assignment will be distributed by Monday 11 March.
As noted above, each student is expected to make a short (max 15 minute) presentation at some point during the course, on at least one of the prescribed readings. This presentation should provide a succinct critical commentary on the reading you are covering. Criteria for assessment of this presentation are: analysis and commentary (briefly summarises the reading; illuminates it and relates it to the theme of the day’s seminar; offers useful critical comment), and oral presentation skills (including audibility, clarity of any visual material; does not go over time-limit).

It can take up to three weeks to mark the written assignments; the aim is two. Detailed requirements for the assignments will be provided in class. (Note that you are required to provide an electronic copy of your assignments, emailed in to Ralph Chapman, this may be used to check for plagiarism.) Assignment 2 topics might include, for example, an analysis of the role and performance of a New Zealand environmental agency; or the credibility and implications of the rating of New Zealand in the Environmental Performance Index, developed by the Center for Environmental Law & Policy at Yale University.

To pass this course a student must meet the mandatory requirements (including completion of the two assignments and presentation) and achieve at least an average of "C" over all the assessments, weighted as shown above.

Suggested Research Project schedule (guidance only)

- Start by 15 April at latest: Select a topic (and maybe 2 alternative topics) and discuss with fellow students or the course coordinator. Read 3 or 4 papers on the preferred topic and draft a 1-page outline, setting out the background to the topic, the main research question or questions you are focusing on, and the method you are taking to research it.
- By end of Mid trim break – Mon 29 April: Have discussed your outline and draft with fellow students. These discussions will help frame your ideas on the research project. You should now have a tidy first draft including a short literature review drawing on 10-20 sources. Draft should have all elements except Intro and Conclusion.
- By Monday 13 May: Finish a second, very tidy draft including all sections. Then keep refining and ensure it is carefully proof-read (especially if English is not your first language), has a word count, etc. Do final tidying up then…
- Thurs 16 May: Hand in at noon. (You do not need to hand in your outline/drafts and you will not be assessed on these.)

Notices and additional information

Most notices will be given in class. Notices will also be given by email or by Blackboard: [http://blackboard.vuw.ac.nz/](http://blackboard.vuw.ac.nz/) Please note that the course programme and readings will be updated from time to time during the year. For more information, contact Ralph Chapman.

Late work, penalties and extensions

Work handed in late without extensions or extenuating circumstances will be penalised (up to 5% of the mark for each whole day late). For exams, a medical certificate will be required if sickness is involved.

---

2 Turnitin policy: Student work provided for assessment in this course may be checked for academic integrity by the electronic search engine [http://www.turnitin.com/](http://www.turnitin.com/). Turnitin is an on-line plagiarism prevention tool which identifies material that may have been copied from other sources including the Internet, books, journals, periodicals or the work of other students. Turnitin is used to assist academic staff in detecting misreferencing, misquotation, and the inclusion of unattributed material, which may be forms of cheating or plagiarism. You are strongly advised to check with your tutor or the course coordinator if you are uncertain about how to use and cite material from other sources. Turnitin will retain a copy of submitted materials on behalf of the University for detection of future plagiarism, but access to the full text of submissions will not be made available to any other party.
ENVI 520: Course programme (subject to updating)

Note that the alignment between dates and topics is indicative only, and can be expected to vary over the year. Names of guest speakers to be advised.

4 Conclusion

| Week 12 4 Jun | Improving environmental outcomes: the potential for change [Chapman]  
Reshaping govt institutions; better integrating the environment into the thinking of agencies of govt; capacity building; building a wider constituency; international networking. | Beddoe et al (2009) |

Study period and Exam period: Mon 10 June – Wed 3 July.
ENVI 520: Readings
This reading list is copyright and should not be reproduced without A/Prof Chapman’s permission. Note that this list may be updated and revised.
Items which can be uploaded directly from Blackboard are highlighted in grey.

“So far, we're not doing any better than cyanobacteria -- consume resources, and reproduce until everything is filled up and used up.”

1. The big picture:

1.1 A brief history of environmental issues and environmental politics

Prescribed

Wright, R. (2005) A Short History of Progress. New York: Carroll & Graf Publishers. [Last chapter only, i.e. Ch V.. The whole book is about 140pp, but a quick read] [CB151 W952 S: 3 day loan]

Recommended additional readings to sample

1.2 The big picture: The main drivers of current patterns of global behaviour
Economic growth, trade and globalisation; technology and its impact; consumption patterns

Recommended:

1.3 Environmental politics and neoliberalism [Dr Bond]

Neoliberalism, neoliberal nature, action and democracy.

Recommended

* Key readings

1.4 Environmental decision making: communities, resilience and democracy [Dr Bond]

Institutions and governance, implications of social-ecological systems theory, relocalisation and resilience

Recommended

* Key readings
2 Environmental management: ways of seeing

2.1 The big picture: sustainability and well-being [Chapman]
What is sustainability? Choice; health; development; happiness

*Sustainability is the capacity to create, test and maintain adaptive capability.* - Holling, Gunderson and Ludwig, 2002

Clark, W.C. (2007) 'Sustainability Science: A room of its own', *Proceedings of the National Academy of Sciences*, 104 (6), pp.1737-1738,

Recommended:

Clark, W.C. (2007) 'Sustainability Science: A room of its own', *Proceedings of the National Academy of Sciences*, 104 (6), pp.1737-1738,

http://www.pnas.org/content/104/6/1737.full.pdf+html

2.2 Disciplines and systems thinking [Dr Chapman]
The ‘environment’ and ‘resources’; disciplines of environmental management, interdisciplinary; systems thinking, scale, emergence; resilience

...this is not a question of changing what individuals do or do not do, but changing whole systems of economic, technological and social practice. Systems are crucial here and not individual behaviour. - John Urry, 2010

[Chapter 2: From the Parts to the Whole][QH501 C251 W: closed reserve]

**Recommended**

---

2.3 Ways of seeing: science, risk and uncertainty [Dr Haalboom]
Scientific objectivity and rationality; Risk, uncertainty, and trust; Environmental governance and risk-based decision-making

Recommended

2.4 Ways of seeing: ethics, values, art [Dr Hutchings]
Different world views: Maori, Christian and other perspectives; values as influences on environmental behaviour; environmental citizenship (incl. education for sustainability), art

Recommended

2.5 Ways of seeing: the Individual & environmental change [Dr Chapman]

Understanding the individual’s resistance to pro-environmental behaviour; evaluating and improving the sophistication of interventions

Recommended:

3 Environmental management in practice in Aotearoa/ New Zealand

3.1 Case studies: growth and progress; and water

Recommended:

3.2 Environmental management in practice in Aotearoa New Zealand: case studies – cities and transport

Recommended

4 Conclusion

Improving environmental outcomes; concluding thoughts

Improving environmental outcomes; using the range of policy instruments – from institutional change to behaviour change; the potential for change

“Choosing policy instruments is thus not simply about changing incentives. First of all it is about instituting certain logics, about understanding which institutional frames people apply, and about influencing these frames.” – Vatn (2005)

General University Policies and Statutes
Students should familiarise themselves with the University’s policies and statutes, particularly the Assessment Statute, the Personal Courses of Study Statute, the Statute on Student Conduct and any statutes relating to the particular qualifications being studied; see the Victoria University Calendar available in hard copy or on the VUW website at

[http://www.victoria.ac.nz/home/study/calendar.aspx](http://www.victoria.ac.nz/home/study/calendar.aspx)

Student and Staff Conduct
The Statute on Student Conduct together with the Policy on Staff Conduct ensure that members of the University community are able to work, learn, study and participate in the academic and social aspects of the University’s life in an atmosphere of safety and respect. The Statute on Student Conduct contains information on what conduct is prohibited and what steps are to be taken if there is a complaint. For information queries about complaint procedures under the Statute on Student Conduct, contact the Facilitator and Disputes Advisor or refer to the statute on the VUW policy website at:

[www.victoria.ac.nz/home/about/policy/students.aspx](http://www.victoria.ac.nz/home/about/policy/students.aspx)

The Policy on Staff Conduct can be found on the VUW website at:

[www.victoria.ac.nz/home/about/policy/staff.aspx](http://www.victoria.ac.nz/home/about/policy/staff.aspx)

Academic Grievances
If you have any academic problems with your course you should talk to the tutor or lecturer concerned; class representatives may be able to help you in this. If you are not satisfied with the result of that meeting, see the Head of School or the relevant Associate Dean; the VUWSA Education Coordinator is available to assist in this process. If, after trying the above channels, you are still unsatisfied, formal grievance procedures can be invoked. These are set out in the Academic Grievance Policy which is published on the VUW website at:

[www.victoria.ac.nz/home/about/policy/students.aspx](http://www.victoria.ac.nz/home/about/policy/students.aspx)

Academic Integrity and Plagiarism
Academic integrity is about honesty – put simply it means no cheating. All members of the University community are responsible for upholding academic integrity, which means staff and students are expected to behave honestly, fairly and with respect for others at all times.

Plagiarism is a form of cheating which undermines academic integrity. The University defines plagiarism as follows:

*The presentation of the work of another person or other persons as if it were one’s own, whether intended or not. This includes published or unpublished work, material on the Internet and the work of other students or staff.*

It is still plagiarism even if you re-structure the material or present it in your own style or words.

*Note:* It is however, perfectly acceptable to include the work of others as long as that is acknowledged by appropriate referencing.

Plagiarism is prohibited at Victoria and is not worth the risk. Any enrolled student found guilty of plagiarism will be subject to disciplinary procedures under the Statute on Student Conduct. All cases will be recorded on a central database and severe penalties may be imposed. Consequences of being found guilty of plagiarism can include:

- an oral or written warning
- cancellation of your mark for an assessment or a fail grade for the course
- suspension from the course or the University.

Find out more about plagiarism, and how to avoid it, on the University’s website:

[www.victoria.ac.nz/home/study/plagiarism.aspx](http://www.victoria.ac.nz/home/study/plagiarism.aspx)
Students with Impairments (see Appendix 3 of the Assessment Handbook)

The University has a policy of reasonable accommodation of the needs of students with disabilities. The policy aims to give students with disabilities the same opportunity as other students to demonstrate their abilities. If you have a disability, impairment or chronic medical condition (temporary, permanent or recurring) that may impact on your ability to participate, learn and/or achieve in lectures and tutorials or in meeting the course requirements, please contact the course coordinator as early in the course as possible. Alternatively, you may wish to approach a Student Adviser from Disability Support Services (DSS) to discuss your individual needs and the available options and support on a confidential basis. DSS are located on Level 1, Robert Stout Building:

telephone: 463-6070
email: disability@vuw.ac.nz

The name of your School’s Disability Liaison Person is in the relevant prospectus or can be obtained from the School Office or DSS.

Student Support

Staff at Victoria want students to have positive learning experiences at the University. Each faculty has a designated staff member who can either help you directly if your academic progress is causing you concern, or quickly put you in contact with someone who can. Assistance for specific groups is also available from the Kāi whaiao Maori, Manaaki Pihipihinga or Victoria International.

In addition, the Student Services Group (email: student-services@vuw.ac.nz) is available to provide a variety of support and services. Find out more at: www.victoria.ac.nz/st_services/

VUWSA employs an Education Coordinator who deals with academic problems and provides support, advice and advocacy services, as well as organising class representatives and faculty delegates. The Education Office (tel. 463-6983 or 463-6984, email at education@vuwsa.org.nz) is located on the ground floor, Student Union Building.

Copyright warning

With this outline, you are being provided with copies of copyright material made for educational purposes. These include extracts of copyright works copied under copyright licences. You may not make these materials available to other persons, nor make a further copy for any other purpose. Failure to comply with the terms of this warning may expose you to legal action by a rights owner and/or disciplinary action by the University.
