Withdrawal from Course

1. Your fees will be refunded if you withdraw from this course on or before Friday 14th March 2014.

2. The standard last date for withdrawal from this course is Friday 16th May. After this date, students forced to withdraw by circumstances beyond their control must apply for permission on an ‘Application for Associate Dean’s Permission to Withdraw Late’ including supporting documentation. The application form is available from either of the Faculty’s Student Customer Service Desks.

Class Times and Room Numbers
Lectures are held on Wednesdays from 19:40 to 21:30 in Government Buildings, Lecture Theatre 4, GBLT4
Course Delivery

The course will be delivered in class sessions with case discussions and lectures.

Group Work
Collaboration on assignments is **not allowed** beyond general discussion as to how one might interpret the nature of assignment questions. Please do not formulate shared responses to questions and do not loan out completed assignments or borrow them. VUW takes plagiarism seriously and electronic checks such as turnitin.com may be used to monitor across a class and against previous year’s classes for rote copying.

Expected Workload
A total of 150 hours of work is expected from students in this course. That consists of approximately 24 hours of classes, approximately eight hours per week outside classes during teaching weeks spent reading, studying and writing assignments, and a further 30 hours revising during the mid-trimester break and study week.

Prescription
An introduction to information systems with an emphasis on understanding how computers can be used effectively in organisations. The course explores information technology, the organisational implications of technology, and the management of information systems.

Introduction

Within the last few decades information technology (IT) and information systems (IS) have had an enormous impact on organizations and their ability to gain and maintain a competitive advantage. Managers are expected to be able to contribute in an informed manner to information systems decisions affecting their area. Information technology has become an important change lever for reinventing the structure, operation and management of organizations. Managers must be able to integrate IT into their management plan. The questions that must be answered to leverage systems cannot be left to IT staff. While IT staff will contribute to the decision process, managers need to be responsible for IT strategic decisions.

This course provides an introduction to information systems. It is designed to improve the students’ understanding of information technology, its role in sustainable organizational performance, and the many managerial issues that surround its adoption and use. The students will understand the relationship between the technology, the organisation structure, and the business models currently used.

No prior in-depth knowledge of information technology is presumed and while the course will examine some technologies, the emphasis will be on how these are implemented and used to meet organizational goals.

**Readings**
There is no required textbook in this course. Readings are supplied on Blackboard. Readings for the first half of the course will be uploaded before the first lecture. The remainder will be uploaded in the last lecture before the Mid-trimester break. In addition relevant articles, cases and other material will/may be supplied to the class throughout the course.

**Assessment**

**Assessment Requirements**
There will be three different assessments:

Case Analyses

Three individual case analyses have to be completed during the semester. The student decides on which week the analysis will be handed in, as long as there is one completed for each part of the course.

The analysis has to be on the case discussed on the week it is submitted. The analysis has to use the material provided in the reading list.

The case analysis seeks to explain a situation or provide guidelines for actions using the theory. These assignments demand the production of original knowledge. Summarizing concepts covered in the paper or summarizing the case is not acceptable and will be given a score of zero.

Submissions can only be done electronically, using Blackboard.

Submissions have to be uploaded on Blackboard before the beginning of class, the week the case is discussed. No late assignment will be accepted and no extension will be given.

Each case analysis cannot be longer than 2000 words. Only the first 2000 words will be considered for marking.

All submissions have to be uploaded in a Word compatible format (.doc .docx .rtf)

In particular, there will be a new grade scheme, in which the A+ range will be 90-100% and 50-54% will be a C-.

Penalties
In fairness to other students, work submitted after the deadline will not be accepted and a “zero” mark will be applied. In the event of unusual, unforeseen circumstances (e.g., serious illness, family bereavement), students should discuss arrangements with the Course Coordinator.

Use of Turnitin
Student work provided for assessment in this course may be checked for academic integrity by the electronic search engine http://www.turnitin.com. Turnitin is an on-line plagiarism prevention tool which compares submitted work with a very large database of existing material. At the discretion of the Head of School, handwritten work may be copy-typed by the School and subject to checking by Turnitin. Turnitin will retain a copy of submitted materials on behalf of the University for detection of future plagiarism, but access to the full text of submissions will not be made available to any other party.

Examinations (40%)
Addresses course learning objectives 1, 2, 3
Students who enrol in courses with examinations are obliged to attend an examination at the University at any time during the formal examination period.

An open-book 2-hour final examination for this course will be scheduled at some time during the Examination Period, i.e. between Friday 14 June and Wednesday 3 July 2013. Detailed modalities will be communicated during the semester. In accordance with Victoria MBA programme policy, students must obtain a minimum of 40% of the marks available for the final examination in order to pass the course.

Expectations and Mandatory Course Requirements
Students are expected to attend all lectures, read assigned material and contribute to class discussions.
To meet mandatory requirements students have to:
  i) Submit all assignments by the due dates
  ii) Obtain at least 40% (out of 100% or 16/40) in the exam.
Failure to meet mandatory requirements does not prevent a student completing other pieces of assessment, including any final examination. (See section 2 of the Assessment Handbook).

Class Representative
A class representative will be elected in the first class, and that person’s name and contact details will be available to VUWSA, the Course Coordinator and the class. The class representative provides a communication channel to liaise with the Course Coordinator on behalf of students.

Communication of Additional Information - Blackboard
Additional information or information on changes will be announced in class, posted on Blackboard and/or e-mailed to students, depending on the situation. It is imperative that students monitor Blackboard regularly as well as their student e-mail accounts.

Referencing
There are many different styles of referencing and the Faculty of Commerce & Administration at VUW has decided to make APA (American Psychological Association) referencing style the common standard across the Faculty. The Commerce and Central Libraries hold the APA Style Guide. You can also access the information from the online VUW library site (http://www.vuw.ac.nz/library/research/reference/referencingguides.aspx).

Note to Student
Please note that your assessed work may also be used for quality assurance purposes, such as to assess
the level of achievement of learning objectives as required for accreditation and audit purposes. The
findings may be used to inform changes aimed at improving the quality of FCA programmes. All
material used for such processes will be treated as confidential, and the outcome will not affect your
grade for the course.
